Essential Technical Integrations Included Across All Packages

- **Platform Integration:** We build your store on WordPress WooCommerce or Shopify—the two most reliable and scalable e-commerce platforms globally. These allow powerful customization, extensive plugin support, and smooth user experiences.
- **Payment Gateway Integration:** Seamless connection to multiple trusted payment gateways such as Razorpay, PayTM, Stripe, and PayPal to ensure secure and flexible customer transactions.
- **Shipping & Logistics Integration:** Automate shipping label generation, real-time order tracking, and delivery notifications by integrating with leading logistics partners.
- **Product & Inventory Management:** Ensure your product catalog and stock levels are automatically updated, preventing overselling and maintaining accuracy across sales channels.
- **Customer Relationship Management (CRM):** Internal systems integration to manage customer data, order history, and support requests efficiently.
- **Marketing Tools Integration:** Connect with email marketing platforms (e.g., Mailchimp), and social media channels to facilitate customer engagement and retention campaigns.
- **SEO & Analytics Setup:** Integrated SEO basics and Google Analytics implementation to help track visitor behavior and improve search rankings.
- **Security & Compliance:** SSL certification, GDPR compliance modules, and secure checkout features to protect your store and your customers.

Post-Launch Support

Beyond building and launching your online store, we provide comprehensive post-launch support including:

- Regular website maintenance & updates
- Performance monitoring and optimization
- Security patching and backups
- Feature enhancements and bug fixes
- Customer support and training

Our goal is to ensure your platform remains reliable, fast, and competitive in a constantly evolving market.

Starter vs Growth (Standard) Package: Technical Scope Comparison

Aspect	Starter Package	Growth Package
